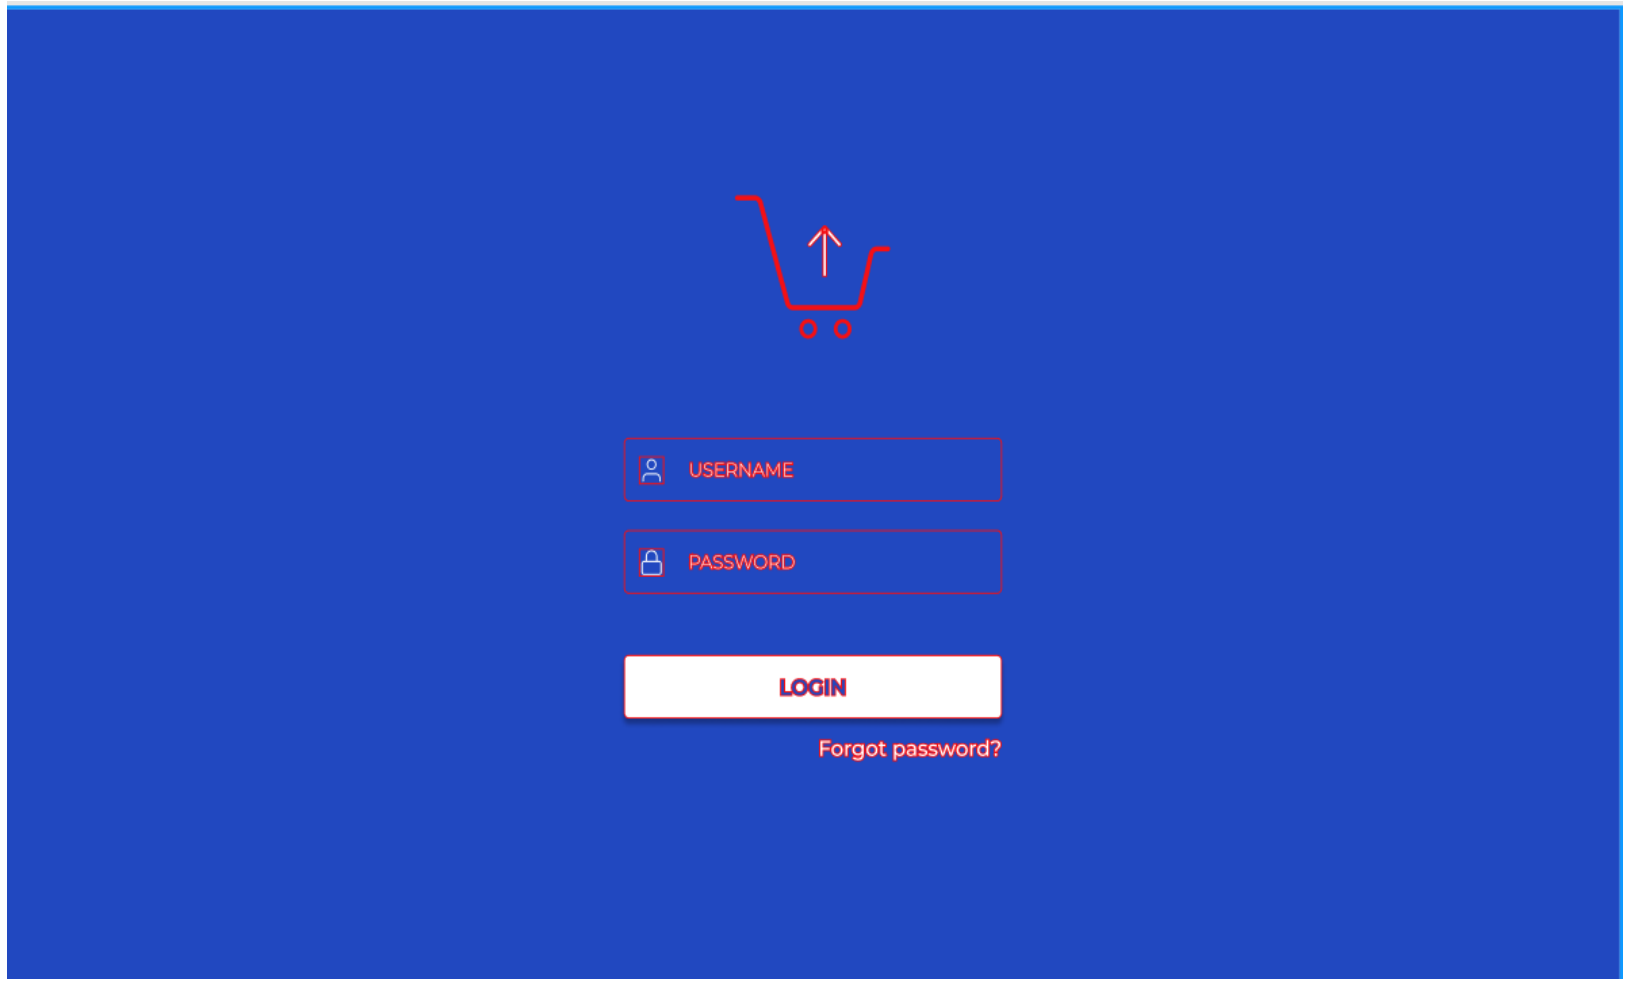
USER INTERFACE AND DESIGN

EXPERIMENT-1

NAME:NITHYA SHREE S

ROLL NO:240701367

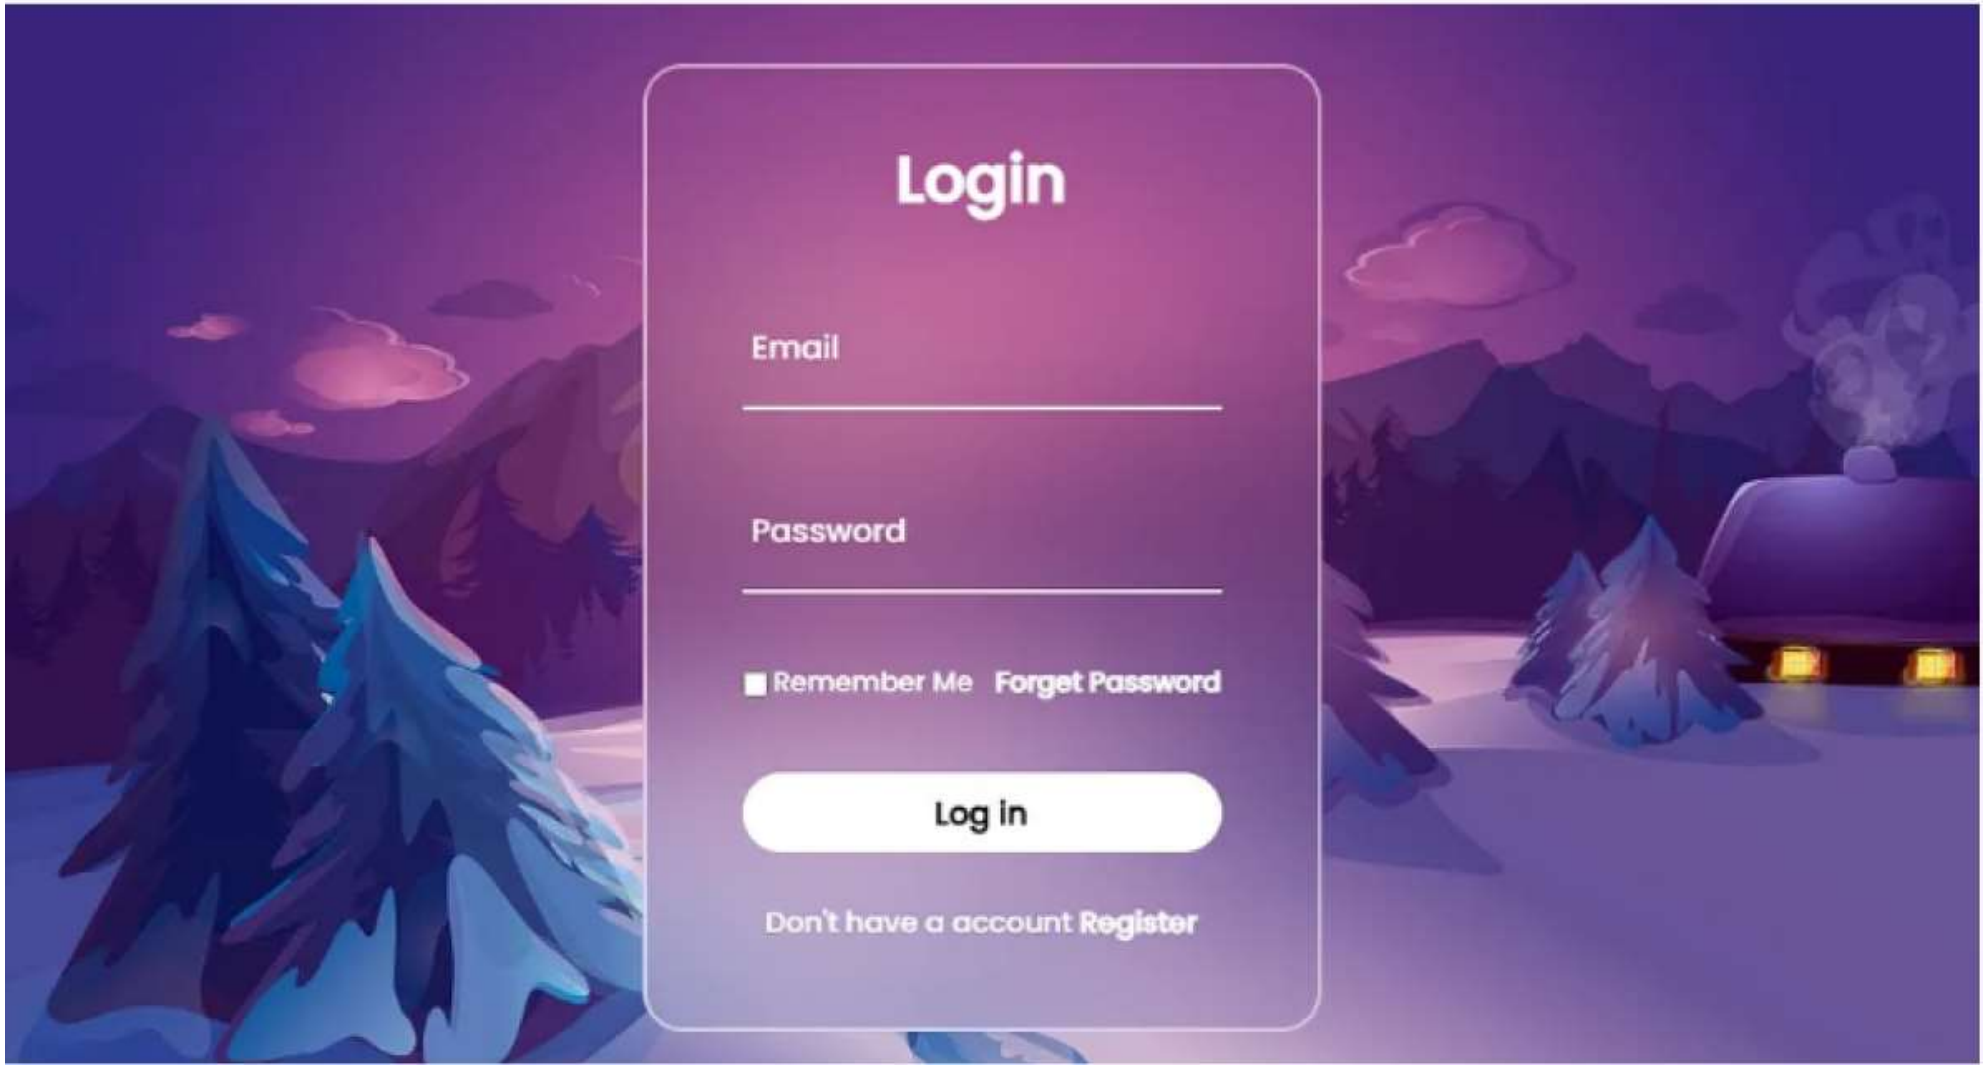
1.BAD DESIGN:



1.BAD WEBSITE (Login Page – Blue Background):

- **1. Design Style:**
- Simple and plain design.
- Uses bright blue background with red icons and text.
- No visual attraction or creativity.
- **2. Content:**
- Contains only username, password, and login button.
- No welcome text or guidance for the user.
- **3. Color & Readability:**
- Poor color contrast between background and text.
- Red color on blue background reduces readability.
- **4. User Experience:**
- Too much empty space on the screen.
- Layout looks dull and unengaging.
- Cart icon is confusing for a login page.
- **5. Accessibility:**
- Not comfortable for long usage.
- Difficult for color-blind users.
- **Purpose:**
- Only focuses on basic login functionality without considering user experience.

2.GOOD DESIGN:



2.GOOD WEBSITE (Login Page – Scenic Background):

- **1. Design Style:**
- Modern and attractive design.
- Uses gradient colors and illustrated background.
- Login form is placed inside a clear card layout.
- **2. Content:**
- Includes email, password, remember me, forgot password, and register option.
- Proper labels help users understand easily.
- **3. Color & Readability:**
- Good contrast between text and background.
- Soft colors make it easy on the eyes.
- **4. User Experience:**
- Clean and organized layout.
- Login button is clearly visible.
- Extra options improve usability.
- **5. Accessibility:**
- Easy to navigate and user-friendly.
- Suitable for all types of users.
- **Purpose:**
- Designed to provide a smooth and pleasant login experience.

- **KEY DIFFERENCES:**
- The bad login page is **simple but unattractive**, while the good login page is **visually appealing and user-friendly**.
- The bad design lacks proper color contrast and layout structure.
- The good design follows UI principles like clarity, consistency, and accessibility.

THANK YOU!!!
